(54) Title: BACK LIGHT ASSEMBLY AND LIQUID CRYSTAL DISPLAY DEVICE HAVING THE SAME

(57) Abstract: A backlight assembly (600) of the present invention includes a light guide plate (LGP), a light reflecting member (200), two lamps (300). The LGP includes a light incidence face (136), a light reflecting face (150), and a light exiting face (160). The light reflecting face (150) reflects a first light toward the light exiting face (160) to transform the first light into a second light. The second light exits from the light exiting face (160). A width of the light incidence face (136) is a first distance. The light reflecting member (200) covers the light incidence face (136) so as to form a receiving space (240). The two lamps (300) are disposed in the receiving space (240). The two lamps (300) are spaced apart from each other by a second distance. A sum of diameters of the two lamps and the second distance is longer than the first distance. According to the present invention, a weight, a volume and a thickness of the LGP is reduced.

CLASSIFICATION OF SUBJECT MATTER

IPC⁷: G02F 1/13357, G02B 6/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC⁷: G02F, G02B

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

EPODOC, WPI, PAJ

* Special categories of cited documents:

„A“ document defining the general state of the art which is not considered to be of particular relevance

„E“ earlier application or patent but published on or after the international filing date

„L“ document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

„O“ document referring to an oral disclosure, use, exhibition or other means

„P“ document published prior to the international filing date but later than the priority date claimed

„T“ later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

„X“ document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

„Y“ document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

„&“ document member of the same patent family
